We have a passion for progress.

The “can-do” spirit is at the heart of Hyundai’s heritage. It’s the attitude of progressing, no matter what. From humble beginnings, this vision has driven us to seek new challenges, encapsulated since our founding in the name ‘Hyundai’ – meaning ‘modern times’.

It’s the persistent curiosity for what lies ahead. Of always chasing the next. What was once a man’s desire for better is today the ethos of an entire company. As our founder said: “How does one know it’s impossible if one hasn’t tried it?”

Progress doesn’t happen by chance. We’re always pushing the borders of the possible, building tomorrow’s technology today, and powering the future with an ever-evolving range of zero-emission powertrains, seamless in-car connectivity and more.

We’ve come a long way. And we won’t stop here.

Creating a new **definition of timeless.**

Taking inspiration from the past to design for the future.

Inspired by the original Hyundai PONY and evoking a daring spirit, IONIQ 5 reflects Hyundai's 48-year journey to become an integral part of popular culture, creating a common thread from past to present and through to the future.

Reimagined for the future.

IONIQ

With its electrifying design and advanced innovations, IONIQ 5 is changing the way people look at electric cars.

This is the perfect embodiment of innovative concept car design with amazing performance, environmentally-friendly materials and an astonishing array of smart technology.

A commanding view.

Bold. Unique. Pure.

Exploring a new design freedom.

IONIQ 5's captivating design is a refreshing take on electric vehicles, stripping away all complexity.

Smooth and seamless with a strong focus on minimalism, Hyundai's first-ever clamshell hood spans the entire width of the car – minimising panel gaps for a clean, high-tech look.

Precisely modelled surfaces and shapes give IONIQ 5 an angular, almost geometric appeal. Taut and perfectly proportioned, the side graphics are highlighted by flush door handles that vanish to enhance the clean look and aerodynamics.

The crowning glory of the striking front-end is those distinctive LED headlamps with their 256 Parametric Pixels – unique jewel-like design elements.

Aero-optimized wheels further echo the 'Parametric Pixel' design theme.

**Live. Drive. Work.
Relax.**

Welcome to a whole new in-car experience.

Featured for the first time with IONIQ 5, and the basis for all future Hyundai electric models, our dedicated new electric vehicle platform gives us the opportunity to re-imagine our interiors and offer a new level of roominess, versatility, convenience and tranquility.

A flat floor with front seats that can be fully reclined¹ and a flexible centre console that can be slid effortlessly back between and behind the front seats, all make for an extraordinary experience and maximise the sheer sense of openness.

Designed to handle everything you and your busy life can throw at it, the versatile IONIQ 5 offers plenty of room for passengers and luggage, providing you with a generous boot capacity of 527 litres. With the 60:40 foldable seats folded down and 1,587 litres of space available, IONIQ 5 can accommodate everything you need for a weekend escape or bring back that large piece of upcycled furniture from the restorer.

What's more, environmentally-friendly materials like eco-processed leather and recycled yarn are used throughout, adding to the sustainability credentials of our manufacturing processes.

¹ Relaxation seats are standard on Namsan Edition or part of the optional Tech pack on Ultimate.

Namsan Edition.

IONIQ 5 reaching new heights.

Namsan Edition takes its name from Namsan Mountain - a scenic landmark in Central Seoul, South Korea which offers panoramic views of the city. The Namsan Edition adds additional features to the specification of IONIQ 5 including the stunning Vision Roof (a full panoramic glass roof) and Relaxation seats. New technology includes the UK debut of the Full Digital Side Mirror (DSM) which improve the driver's rear view in all weathers.

Vision Roof.

Standard on IONIQ 5 Namsan Edition, Vision Roof provides the interior with a greater sense of openness as the ceiling consists of one panoramic glass panel with unobstructed vistas.

Enhanced Ambience to the interior, flooding the cabin with natural light & allows access for the IONIQ 5's passengers to the vehicles surroundings, whilst a retractable motorised sliding cover can be closed when desired. On the outside, the visual is enhanced with a full black appearance (Glass) roof panel.

DSM (Digital Side Mirror).

The DSM (Digital Side Mirror) systems will feature as standard on the Namsan Edition and utilises two side mounted, low profile high definition cameras in the traditional side mirror locations, as well as two interior, door card mounted screens.

This high-tech feature will be available in Europe for the first time in a Hyundai Motor Group vehicle. The DSM reduce air resistance and provide IONIQ 5 customers with an enhanced rear view, even in bad weather. FDM comes as standard on Premium Trim and above, DSM comes as standard on Namsan Edition only.

Next level electric performance.

Equipped with cutting-edge technology for intelligent driving.

With excellent driving dynamics and impressive acceleration, IONIQ 5 is a game changer. To meet your mobility needs and performance aspirations, IONIQ 5 is available with a range of configurations. Choose from two battery variants: 58 kWh (Standard Range) or 77.4 kWh (Long Range). In addition to the standard 2WD versions, the 77.4 kWh battery variant is available as an AWD version with dual electric motors. Here, our signature all-wheel drive system HTRAC™ actively adjusts the driving power distribution to all four wheels to achieve optimal traction in a variety of conditions such as snow, gravel and regular road surfaces. It also improves acceleration, stability and fuel efficiency with either performance or economy in mind.

Maximise your efficiency.

Two paddle shifters behind the steering wheel allow you to choose between 4 different levels of energy regeneration when lifting off the accelerator. By pulling and holding the left paddle shifter for longer than 0.5 seconds, i-pedal driving function is engaged, increasing the regenerative braking to its maximum level. You can stop the vehicle by continuing to hold the paddle shifter. Pull and hold the right paddle shifter for longer than 2 seconds to activate Smart Regenerative Braking mode, which ensures your regenerative braking settings are optimised throughout your journey in any traffic conditions.

298-315 miles

IONIQ 5 delivers an impressive range of up to 315 miles¹ on a single charge.

5.1 seconds

IONIQ 5 delivers a responsive acceleration from 0 to 62 mph in 5.1 seconds².

¹Maximum range according to WLTP combined cycle. Specification dependent. Actual range will vary depending on factors including road conditions, outdoor temperature, driving style, 4 use of climate control and battery condition.

A man with a beard is shown in profile, looking at a smartphone. The phone screen displays the IONIQ 5 app interface, which includes a car image, the text 'IONIQ 5', and several circular icons for vehicle functions. In the background, a silver IONIQ 5 is parked at a charging station. The scene is set outdoors on a paved area with a building and a yellow graffiti wall in the distance.

Make the most of every minute

Time for a quick coffee.

In a hurry? Charge from 10% to 80% in as little as 18-36 minutes at an ultra-fast charging station.¹

Hyundai's world-first patented technology supports both 400V and 800V charging infrastructure without the need for additional components or adapters. This enables you to get in and out of rapid charging stations faster, as you have the flexibility of using a different charger if one is occupied.

Enjoy the speed and convenience of faster charging times.

Ultra-Fast Charging
350 kW DC station

77.4 kWh Long Range Battery
• Charging 10 to 80% in: as little as 18-36 minutes¹

58 kWh Standard Range Battery
• Charging 10% to 80% in: as little as 18-36 minutes¹

Fast Charging
50 kW DC station

77.4 kWh Long Range Battery
• Charging 10% to 80% in: 1 hour¹

58 kWh Standard Range Battery
• Charging 10% to 80% in: 47 minutes¹

¹Based on Hyundai test data for comparison purposes. Actual time will vary and is dependent on a number of factors including battery temperature, condition and age, ambient temperature and the power provided by the charger. Charge time increases in cold weather and if battery temperature activates safeguarding technology. Ultra-fast chargers are currently available on selected motorways/major arterial routes – see the Charge myHyundai app for details. They are not yet available in Northern Ireland.

18 minutes

IONIQ 5 can charge from 10 to 80% in as little as 18-36 minutes when connected to a 350kW ultra-fast charger.¹

Take charge with even more flexible charging solutions with IONIQ 5.

Depending on your grid connection at home or the type of charging station you have access to, IONIQ 5 gives you a range of flexible charging possibilities aside from ultra-fast DC charging.

Most of your charging will happen overnight at home, and you can schedule charging to take advantage of off-peak rates. But you can also top up whilst you're out and about at the supermarket, the gym, the cafe, or many other convenient locations. When you travel further afield you can make the most of the growing high voltage networks such as IONITY, GridServe Electric Highway, InstaVolt and BP Pulse to provide a quick boost to your range.

Plug into a wide range of charging benefits.

Charge myHyundai. Public charging has never been easier or more accessible.

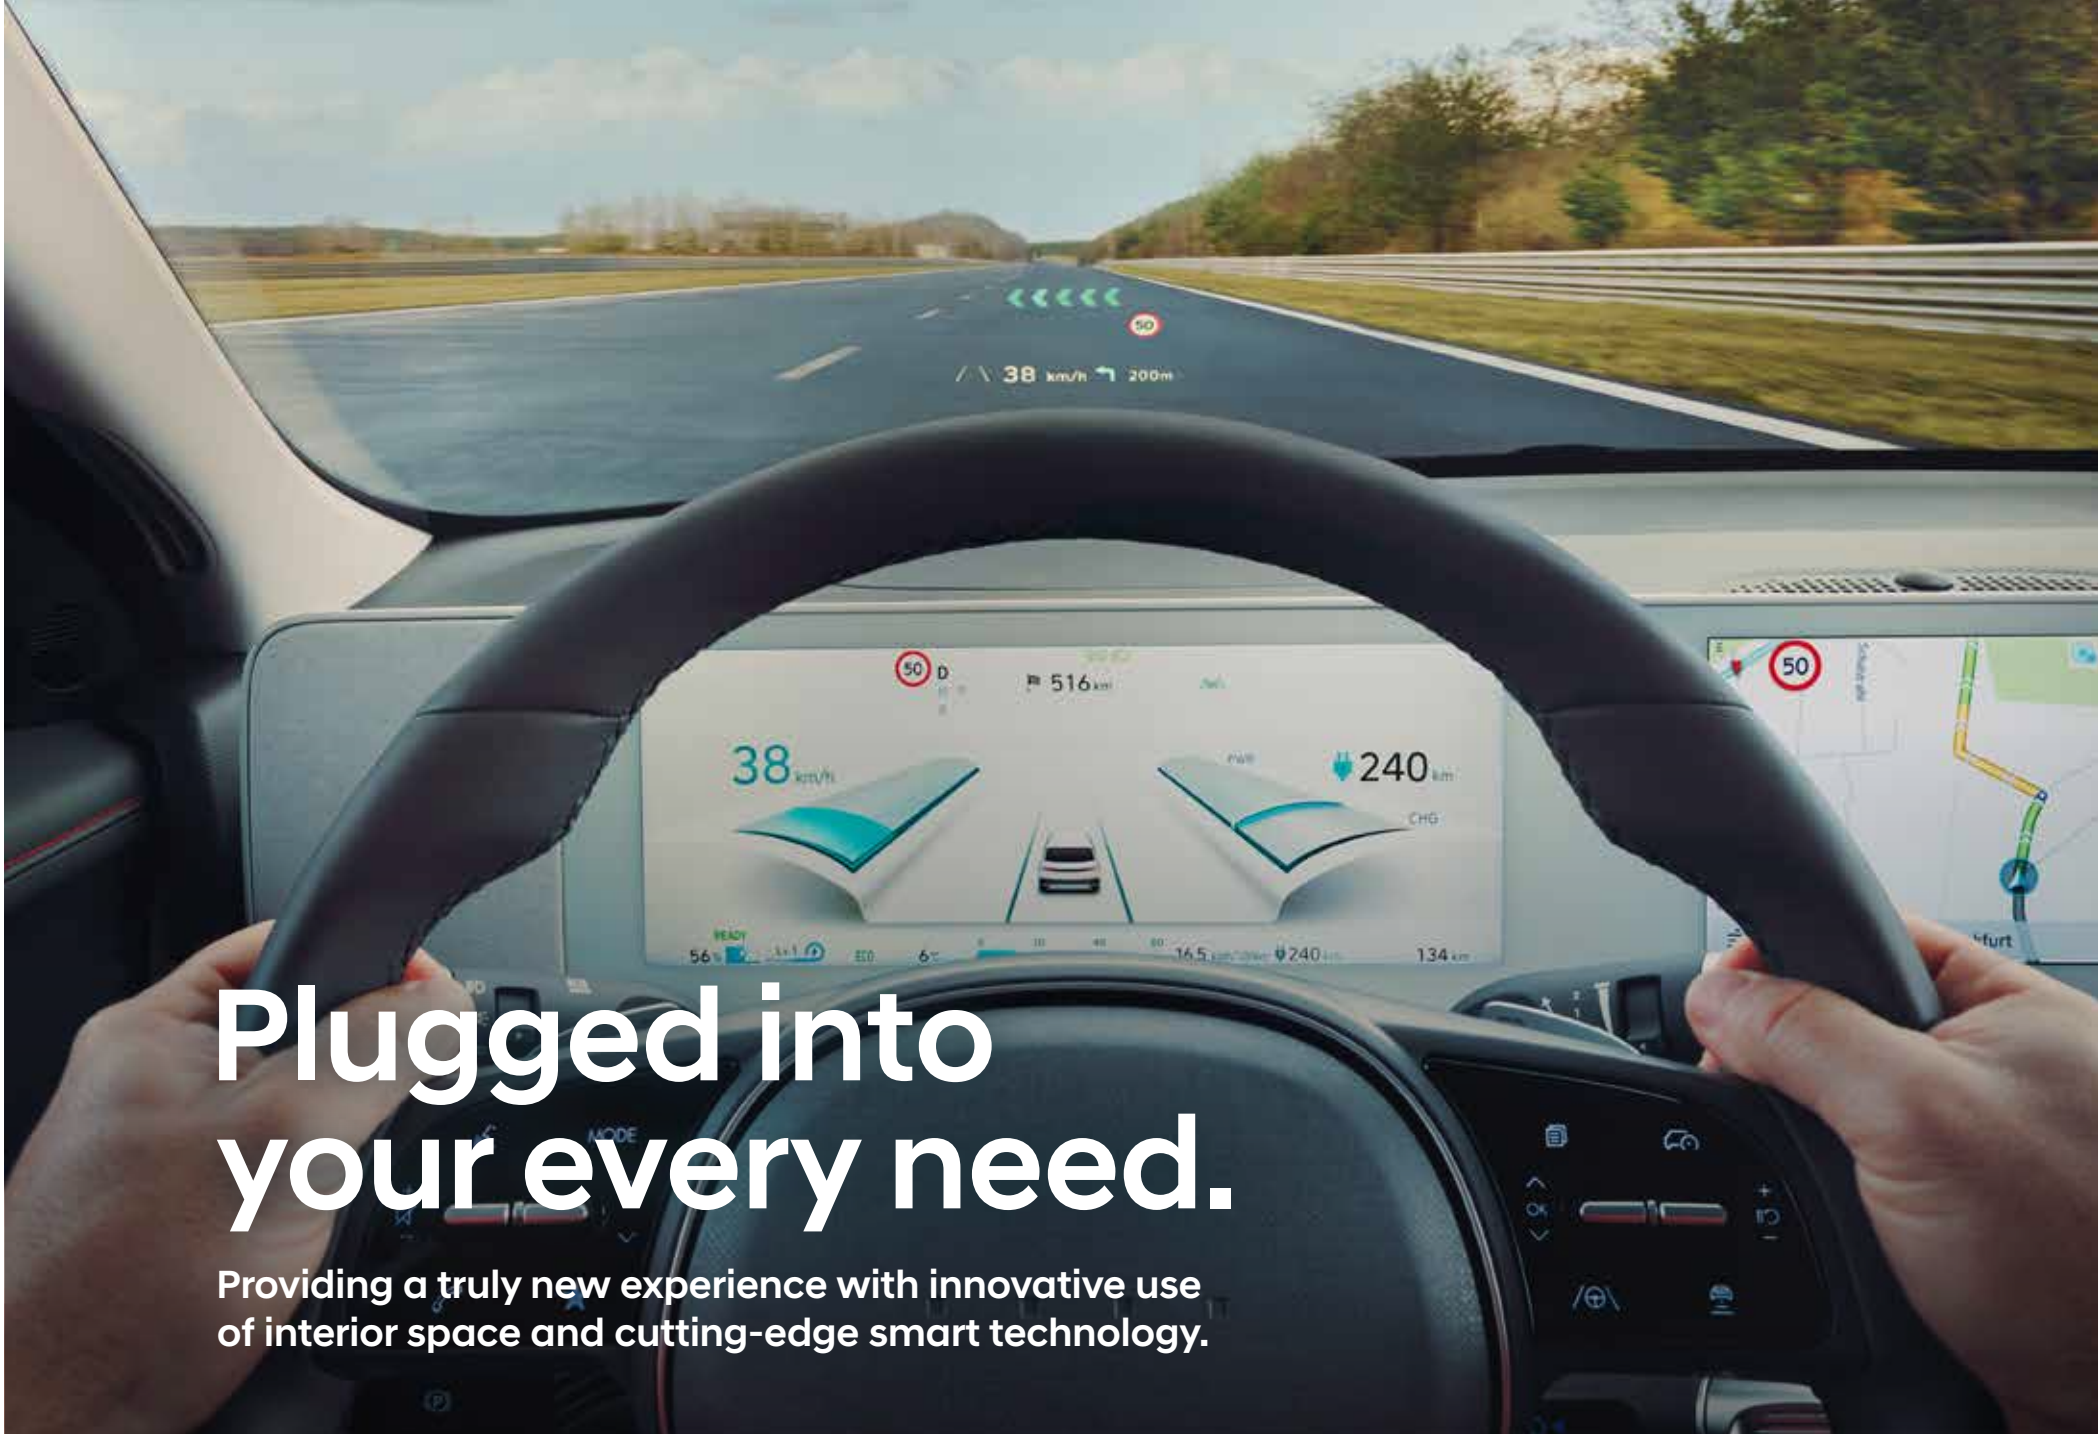

Charge myHyundai is a comprehensive and easy-to-use public charging solution that gives you access to the widest network of public charging points in the UK.

With your Charge myHyundai account, you can locate charging points, check their availability, plug in your IONIQ 5, charge and pay. All charging sessions and invoices are easy to find on the Charge myHyundai web portal or your app.

Use the Charge myHyundai app to search for charge points by plug type, charging speed and method of payment, and to access real-time updates on availability. The app also comes with a navigation function and an intelligent route planner to get you where you need to be without any kind of stress.

Get the app to locate charging stations

Plugged into your every need.

Providing a truly new experience with innovative use of interior space and cutting-edge smart technology.

Vehicle-to-Load technology.

Making life connected and convenient.

IONIQ 5 is masterful integration of digital and analogue technologies. The past, present and future have been brought together to create a dynamic driving experience. The centrepiece of the sleek modular dashboard is the extra wide integrated display which combines a 12.3" full infotainment touchscreen and a 12.3" digital cluster for a high-tech look that comes as standard. The screens display a wide range of electric car-specific information, such as battery status and nearby charging stations.

IONIQ 5 also offers you a bountiful selection of desirable connectivity features. With Apple CarPlay™ and Android Auto™, your smartphone is seamlessly synced. Wireless phone charging is another neat addition. Remain fully connected with all your favourite things through phone mirroring.

Apple CarPlay™ and Android Auto™ smartphone mirroring.

Premium Bose sound system with eight speakers. Available on Ultimate and Namsan Edition

Wireless phone charging.

Plug into a world of possibilities.

Charge or power your electrical goods anywhere, anytime from your IONIQ 5.

Vehicle-to-Load (V2L) enables you to use IONIQ 5's battery to power or charge any of your electric devices from the kettle to your electric scooter. The V2L function is enabled using an accessory adaptor which fits into the outside charging port.

There is also a 3 pin socket between the outer rear seats that allows you to plug and charge electronic items whilst stationary or driving.

Connect to your IONIQ 5 from anywhere.

Control your car from your smartphone or your voice
with **Bluelink®** Connected Car Services.

Before your journey.

With the Bluelink® app, the ease and joy of driving a Hyundai starts well before you're inside. The app communicates with your car, bringing you key data such as your charging schedule which allows you to program start and stop charging times, and to make sure that your car is charged when you are ready to go. You can even plan your route in the comfort of your own home or office, then send it to the navigation system in your IONIQ 5 so it's ready and waiting for you.

During your journey.

Hyundai Bluelink® Connected Car Services make driving easier and more enjoyable, without distracting you from the road. You can even control the navigation and entertainment with your voice, so your hands stay on the wheel. Get more reliable traffic and arrival time forecasting, as well as enhanced route calculations, with Connected Routing. Find charging stations, parking spaces and restaurants with Hyundai Live Services that come free for three years as part of the navigation system.

After your journey.

Your journey doesn't always end when you park. If you're in a busy city, for example, you may have to leave your car some way short of the destination. You can then use Last Mile Navigation to finish the journey on foot. If you think you might have forgotten to lock the car in the rush, you don't have to worry because your app can lock or unlock your Hyundai remotely. And, when you're returning to your IONIQ 5 after your appointment, Find My Car will guide you back to the exact spot.

With Bluelink® Connected Car Services, you're in control of your IONIQ 5 before you even leave the house.

Destination send to car.

Live Services.

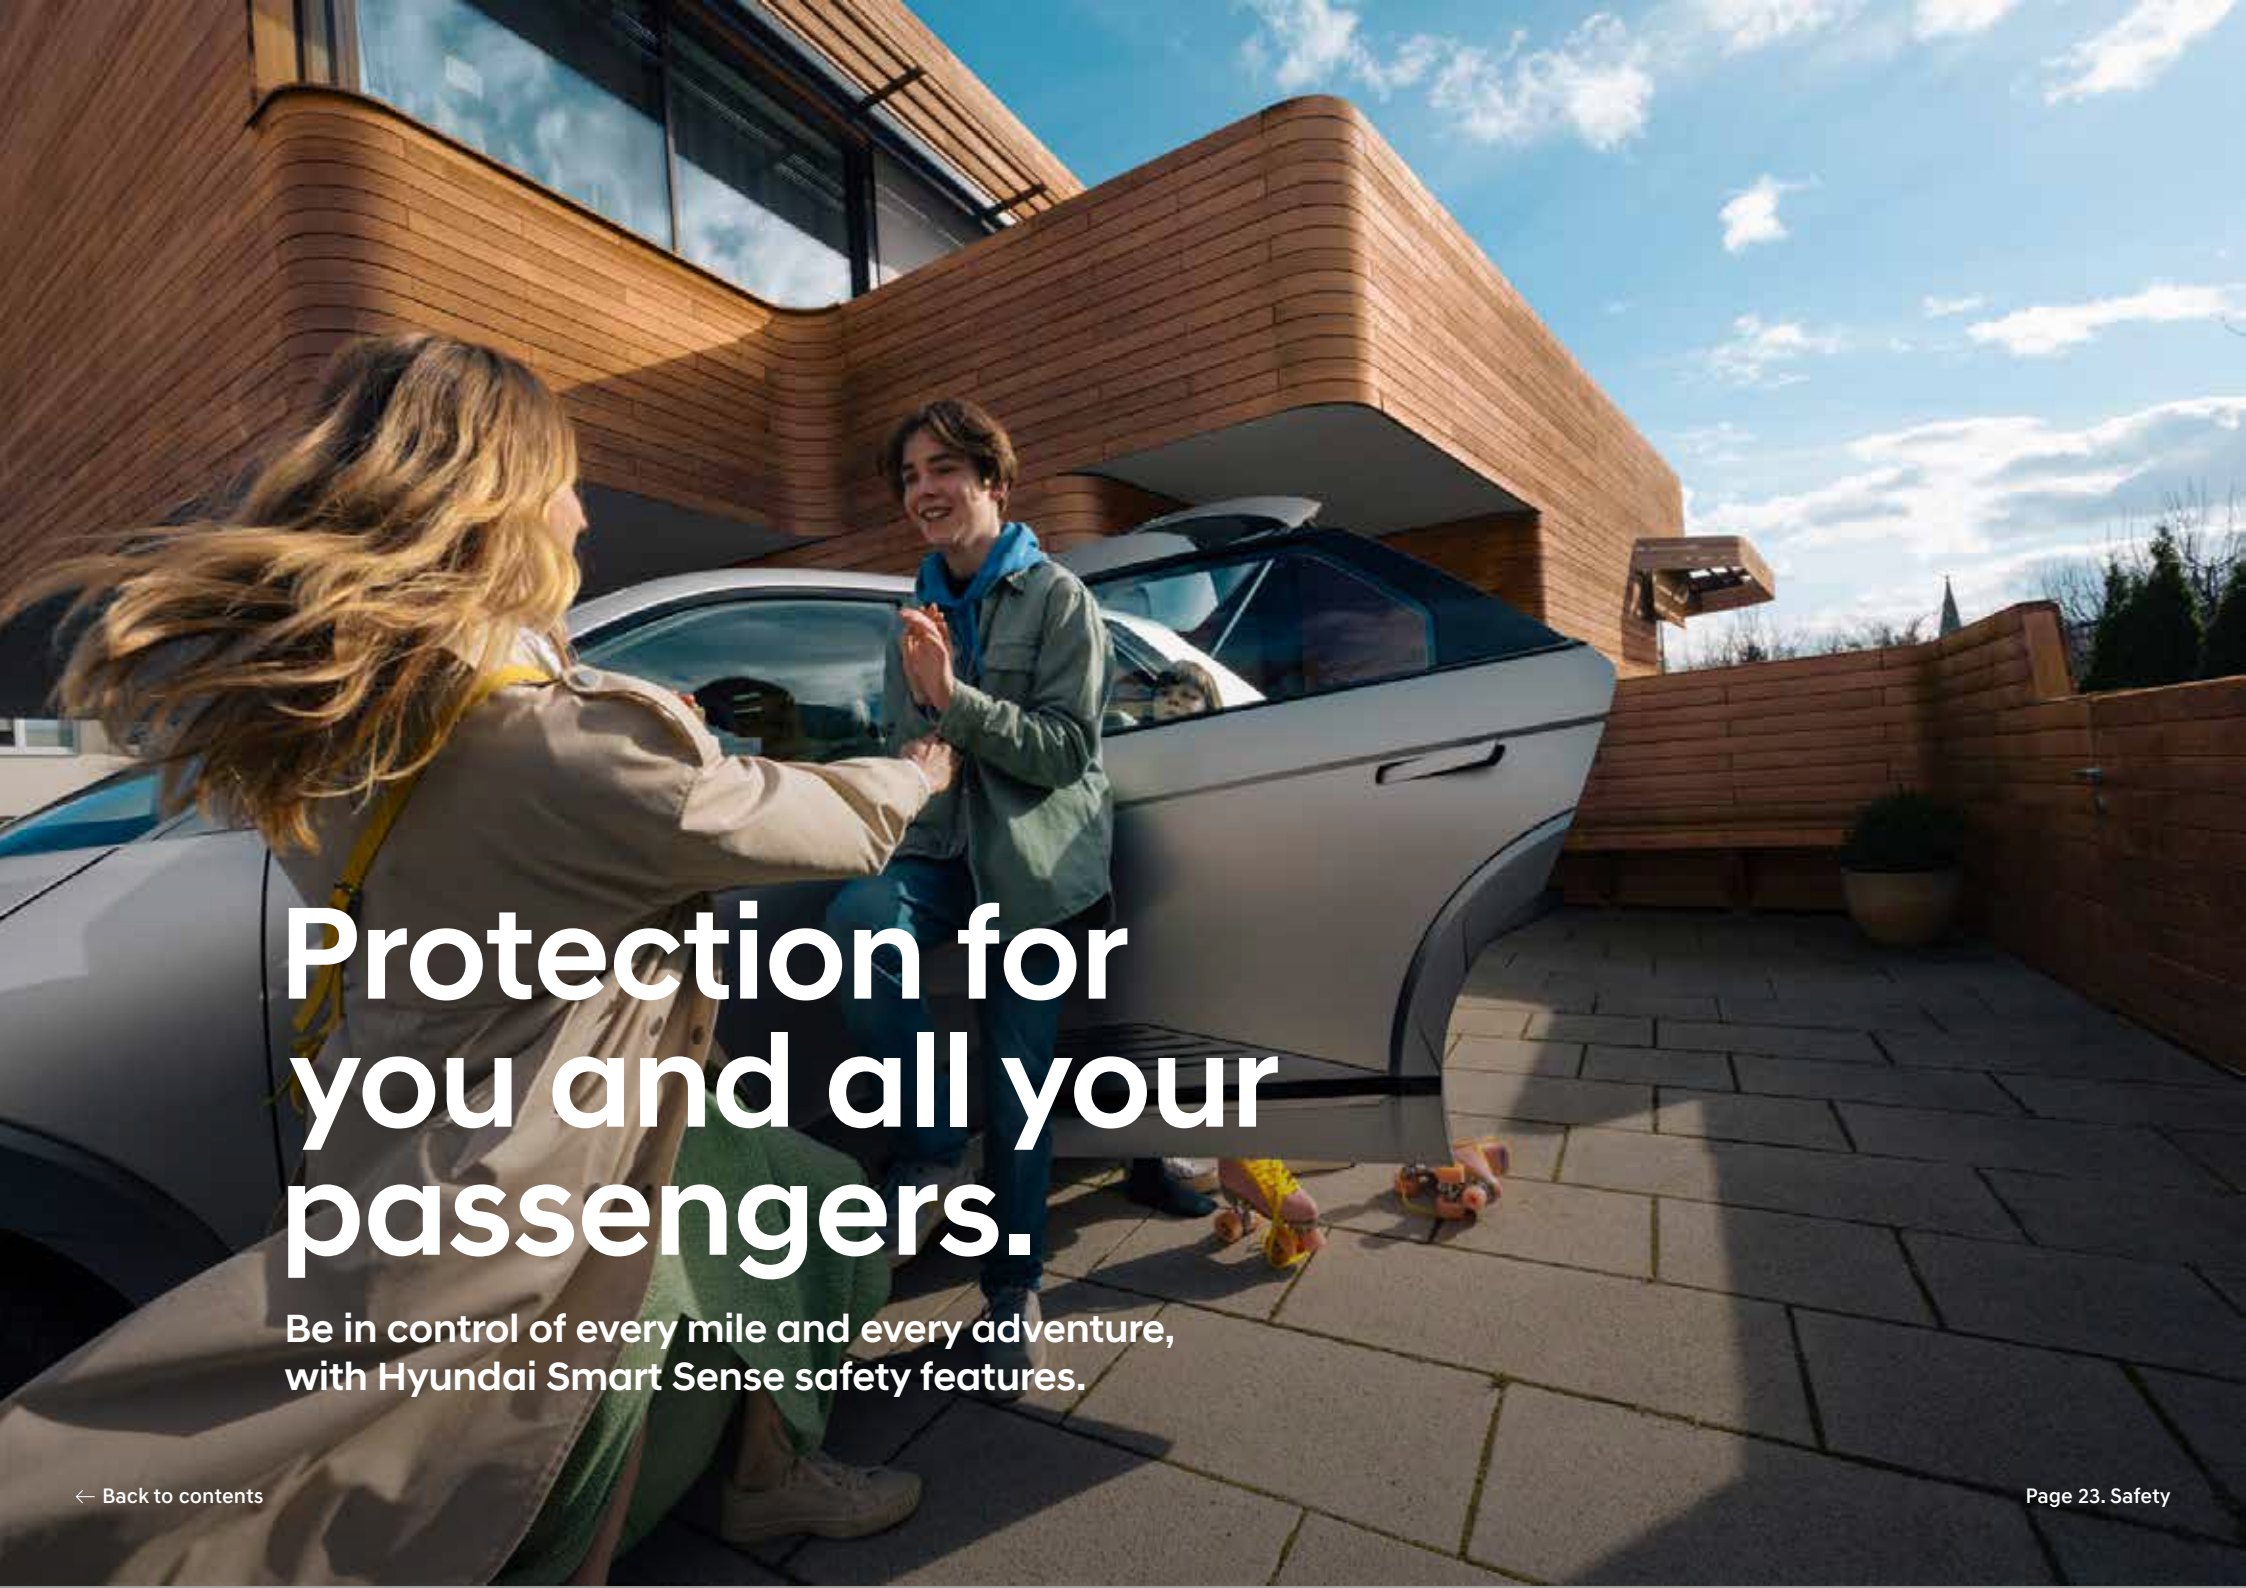

Find my car.

Charging schedule.

Last Mile Navigation.

Protection for you and all your passengers.

Be in control of every mile and every adventure, with Hyundai Smart Sense safety features.

Safety and peace of mind.

With Hyundai Smart Sense, our collection of cutting-edge Advanced Driver Assistance Systems, IONIQ 5 has been equipped with the very latest safety features for added convenience and peace of mind.

Navigation-based Smart Cruise Control (NSCC): Utilises the state-of-the-art navigation system to anticipate upcoming curves or straights on highways and automatically adjusts speed for safer driving. Also, if activated, the set speed also changes automatically whenever the posted speed limit changes.

Forward Collision Avoidance (FCA): The front view camera and radar sensors warn drivers of imminent collisions with vehicles and objects, applying the brakes when necessary to avoid collisions. The system includes Junction Assist (Turning) across the range.

Intelligent Speed Limit Assist (ISLA): External cameras and the onboard navigation system combine to monitor road speed limits, keeping you informed via the navigation screen to keep your pace at a safe speed.

Lane Follow Assist (LFA): Smart sensors and the forward-facing camera detect when the car drifts from the centre of the lane, applying steering torque to maintain road positioning for safety. The car also estimates the trajectory of the vehicle ahead and adjusts its position accordingly.

Lane Keeping Assist (LKA): This system uses the front multi-function camera to monitor the lines of the road. In case of an unintended lane departure, it warns you and can apply counter steering torque to guide the car back to the lane.

High Beam Assist (HBA): Less stress and maximum visibility. HBA not only detects oncoming vehicles but also vehicles in the same lane ahead and switches to low-beam as appropriate.

Leading Vehicle Departure Alert (LVDA): This clever feature for city driving alerts the driver when the vehicle in front departs from an idle state, like at a stoplight or in a traffic jam.

Rear Cross-Traffic Collision-Avoidance Assist (RCCA): Perfect for car parks. When reversing out of areas with low visibility, the system not only warns the driver if vehicles approach from the side, it also applies the brakes automatically.

Highway Driving Assist (HDA): HDA Level 1.5 is cutting-edge semi-autonomous driving technology that keeps you centred in your lane and adjusts your speed so you are always at a safe distance from the car in front and within the speed limit.

Blind Spot Collision Avoidance Assist (BCA): Radars detect traffic in the vehicle blind spot, warning drivers with an audible alarm when the indicator is used so you can be aware of the traffic around you. It will also take action itself, braking to help avoid a collision.

Driver Attention Warning (DAW): When a pattern of fatigue or distraction is identified, the system gets your attention with an alert and pop-up message suggesting a break.

The feel good factor.

Environmentally-friendly materials have been used throughout the cabin. Choose seats covered in either comfortable cloth, or eco-processed leather that is dyed and treated with plant oil extractions from flaxseed. Raw materials extracted from sugar cane are used on the headliner, carpet and seat covers – a solution that is both pleasing to the eye and fully recyclable.

Time to make
it yours.

Bold. Assertive. Genuine.

IONIQ 5 is a masterpiece of minimalistic design. Complementing this philosophy, our Genuine Accessories¹ are designed and engineered to the same rigorous standards. So, not only do they make it easy to add your own personal signature, they always fit perfectly to maintain the design purity of IONIQ 5.

Sports stripe decals. Available in black or white.

Side trim line. Available in Piano black or Brushed aluminium optic.

Bike carrier for all tow bars.

Carpet mats.

All-weather mats.

Front boot liner.

Boot liner.

Detachable tow bar.

Dog guard.

IONIQ 5 Styling kit¹.

The Styling kit consists of Door mirror caps (1), Side trim line (2), and Tailgate trim line in Brushed aluminium optic (3).

Charging ahead with business.

With competitive whole-life costs, 2% BIK rate, state-of-the-art technology, an impressive 315 mile range¹ and our 5-year unlimited mileage and 8-year battery warranties², IONIQ 5 is the ideal choice to add to your fleet or for your next company car.

¹Maximum range according to WLTP combined cycle. Specification dependent. Actual range will vary depending on factors including road conditions, outdoor temperature, driving style, 4 use of climate control and battery condition.

²The Hyundai 5-Year Unlimited Mileage Warranty applies only to Hyundai vehicles that have been originally sold by an authorised Hyundai retailer to an end-customer, as set out in the terms and conditions of the warranty. 8 years or 100,000 mile warranty on vehicle battery unit. Terms and conditions apply.

“Fantastic **BIK rates** ...
merely serve as a
bonus on an already
talented and **desirable**
company car”

Auto Express – July 2021

Keeping great company with IONIQ 5.

With its 2% BIK rate, impressive driving range, ultra-rapid battery charging³, cutting-edge connectivity and Advanced Driver Assistance Systems, IONIQ 5 makes perfect sense for company car drivers.

However, the appeal is far more than just rational. As you will appreciate when you take in that distinctive profile, experience the exceptional driving dynamics and impressive acceleration. Not to mention all that space, versatility and the ability to charge or power electrical items from the car.

Better still, the cost-saving benefits of IONIQ 5 tick all the boxes for the conscientious fleet manager as well as the company car driver.

If you are a business customer and would like to find out more about IONIQ 5 or arrange a test drive, please contact the Hyundai Business Centre on **03443 460 121** or email us at **enquiries@hyundaifleetssupport.co.uk**

¹ Maximum range according to WLTP combined cycle. Specification dependent. Actual range will vary depending on factors including road conditions, outdoor temperature, driving style, 4 use of climate control and battery condition.

² Maximum range assuming battery is fully charged - Actual range according to WLTP combined cycle. Specification dependent. Actual range will vary depending on factors including road conditions, outdoor temperature, driving style, 4 use of climate control and battery condition.

³ Based on Hyundai test data for comparison purposes. Actual time will vary and is dependent on a number of factors including battery temperature, condition and age, ambient temperature and the power provided by the charger. Charge time increases in cold weather and if battery temperature activates safeguarding technology. IONIQ

Specifications shown in this brochure are based upon European left hand drive models and the latest available information at the time of publication. The colours reproduced in this brochure are subject to the variations of screen resolutions and may vary from actual colours and paint finishes.

The WLTP maximum electric range figures were obtained after the battery had been fully charged. This model is a battery electric vehicle requiring mains electricity for charging.

Figures shown are for comparability purposes. Only compare fuel consumption, CO2 and electric range figures with other cars tested to the same technical procedures.

These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load.

For the latest details, or to find out more about the IONIQ 5 please contact your local retailer.
